

Mix and Match

Karen Kendo

This is a design and drawing class which will give longarm and domestic sewing machine quilters the opportunity to learn the motions necessary to quilt those designs. It's all in the muscle memory. While "hands on" longarm classes may be attractive, class size is limited to machines available. This drawing design format solves the problem while opening up the class to ALL machine quilters.

The class is 3 hours. **Materials fee is \$5.**

In this class, Karen will show you how to add design and texture to your quilt by using the piecing intersections and minimal marking. Learn five basic shapes and how to combine them to fit quilt blocks and their components – squares, triangles, rectangles, and more. You will no longer do the stand and stare – you will mix and match your shapes and designs and create beautiful blocks. The possibilities are endless!
